DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-56, drawn to a clip applicator, classified in class 606, subclass 157.
 - II. Claims 57-68, drawn to method for delivery an occlusion clip to occlude a fallopian tube, classified in class 128 subclass 898.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as delivery an occlusion clip to occlude a blood vessel in an open heart surgery that do not required the trocar tube.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b)

if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. A telephone call was made to Applicant's representative on September 10, 2006 to request an oral election to the above restriction requirement but did not result in a response therefore the restriction is mailed out to Applicant's representative.
